

NOTICE TO OUR RESIDENTS

New vertical blinds have been installed for your convenience. Please treat them with care by following these procedures:

1. Use the WAND to first rotate the louvers to at least a partial open position before traversing. This will provide long wear and ease of operation. Never operate by manually pushing, pulling or rotating the louvers.
2. Operate the blinds only by the use of the WAND control.
 - a. Twist the WAND - For rotating the louvers, when controlling the light.
 - b. Traverse the WAND - For traversing or opening the blind.
3. If louvers become soiled, wash with dishwashing liquid and water solution. Towel-dry to minimize static electricity buildup.

NOTICE TO OUR RESIDENTS

New vertical blinds have been installed for your convenience. Please treat them with care by following these procedures:

1. Operate the blinds only by the use of the cord or chain controls.
 - a. **CORD** - Use for traversing or opening the blind.
 - b. **CHAIN** - Use for rotating the louvers when controlling the light.
2. The louvers should first be rotated to at least a partial open position before traversing. This will provide long wear and ease of operation. Never operate by manually pushing, pulling or rotating the louvers. A cord lock has been installed to inhibit traversing the blinds when the louvers are closed.
3. If louvers become soiled, wash with dishwashing liquid and water solution. Towel-dry to minimize static electricity buildup.
